"Like many business owners, my busy schedule led to an oversight of day-to-day safety standards.

I was harshly reminded with nearly \$80,000 in fines when OSHA stopped in to have a look.

I called OSS and was able to save myself thousands. Had I called OSS before OSHA inspected my business, I would have paid nothing. Don't make the mistake I did. Call OSS today."

Who We Are

Occupational Safety Specialists (OSS) is an environmental safety and health training and consulting firm. Established in 1996, OSS helps businesses comply with environmental, safety, and health regulations.

The OSS staff is comprised of individuals with professional expertise and extensive experience with OSHA, RCRA, EPA, DOT and various healthcare fields. Our highly-trained staff ensures effectiveness and upholds our status as a leading provider of environmental, health and safety, construction, transportation, and custom training programs.

OSS Training Programs have been developed in the field and reflect firsthand experience with emergency response and remedial action projects. This practical foundation and our “hands on” approach to training enable students to gain insight and information that cannot be found in other training courses.

We currently keep hundreds of businesses in compliance. We service every industry and businesses of every size.

Health and Safety Manuals

Site-Specific Training
Industry-Specific Training:
Manufacturing
Construction
Chemical
Government Agencies
Utilities
Hospitals
Colleges & Universities

What We Do

We tailor a program to work for your business.

Sessions and materials are customized to meet the specific needs of your organization and your employees. Chemical inventory, emergency response plans and local and state requirements are all taken into consideration in the design and development of our training classes.

We Save You Both Money AND Time.

Our customized programs allow us to work within your budget. We plan your required training for a 6-month or 12-month schedule and save you money, time and stress.

We Remove the Guess Work.

You have enough to worry about with the daily activities of your business. Let OSS keep your company safe and citation-free. Our detailed audits will tell you what needs to be done to keep you from paying fines.

We Educate You.

We will help you understand federal, state and local regulations and make it easier for you to comply. Employee education is mandatory and essential to your business. OSS Professional Trainers make training interesting and practical to real world situations.

We keep you safe.

Government regulations mandate that employees receive training to recognize and guard against the risks associated with working conditions. OSS provides programs that protect human health, safety and the environment in accordance with federal, state and local legal requirements set forth by OSHA, EPA and DOT.

We provide peace of mind.

OSS Safety Programs will keep bad press away and allow you to breathe easier knowing that you are doing the right thing for your business and your employees. You schedule the program, and we handle the rest.

We operate days, nights, and weekends – Whenever you need the training!

Why You Need Us

Many companies and independent businesses overlook the need for a safety program. Either you have too few employees or you are willing to take the risk in hopes that the U.S. Department of Labor (OSHA, EPA, DOT) won't check up on you. Unfortunately, a safety program and compliance with regulations is not only important, **it's the law.**

OSHA issued nearly **\$100 MILLION in fines** last year, issuing an average of nearly **\$3,600 in fines per inspection.** Businesses

Top 10 OSHA Fines for Small Companies

10. **Hazard Communication**
(listing of hazardous materials on site)
 9. **Training** (proper employee education)
 8. **Training Requirements**
(mandated safety training requirements)
 7. **Head Protection**
-

with less than 10 employees accounted for a third of all fines!

The EPA issued nearly **\$130 MILLION in fines** last year, and companies have been forced to spend nearly **\$12 BILLION** to fix their mistakes!

Your company should be thoroughly covered with a written OSS Safety Program whether you have 1 employee or 1,000 employees. The emphasis on safety in the culture of your business can help you avoid thousands in fines.
